Clear Asphalt Binder

Clear asphalt binder is a synthetic blend of constituents suitable for hot mix asphalt. Due to the lack of black pigment, the colourisation is much more intense even with a reduced amount of pigment. Ooms produces and supplies various grades of clear binders. The standard grades are branded Bitucolor while the polymer modified grades are branded Sealoflex® Color.

Where you can use it

The clear binders are suitable for dense asphalt wearing courses, stone mastic asphalt wearing courses, sand asphalt protective layers or for use as raw material in clear binder emulsions.

Delivery: fast and safe

Clear binders are supplied by Ooms in tank trucks, thermal oil heated bitu-containers or in drums.
